

**STUDDING BRP’s REV XP 286 TRACK AND CAMOPLAST 286 PITCH TRACKS**

BRP, Inc. and Camoplast have developed a track that requires a new BRP, Inc. approved stud that must be installed with a new larger support plate. The use of other kinds of studs or support plates on these tracks may cause risks of injuries.

Below is a list of BRP, Inc. 2008 model snowmobiles that may come equipped with a REV XP 286 Phantom Series Track and Camoplast aftermarket tracks with the 286 pitch. This list may change.

Always confirm and follow BRP’s and Camoplast’s studding recommendations and installation instructions.
